

Programming Fundamental Olympics

Problem 1: → Kmls to Mph

IPO:

1. Input Speed in kms
2. $\text{Speed} * 3600 * 0.62$
3. Output Speed in Mph

Pseudo code :

START

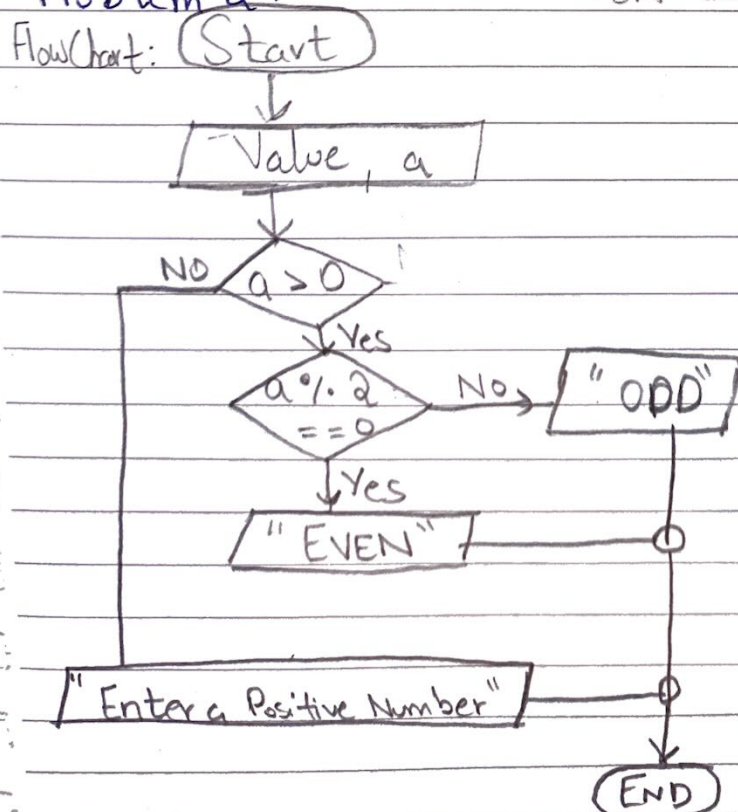

Input Speed in kmls, s

$S * 3600 * 0.62 = \text{Speed in MPH}$

Output Speed in MPH

END

Problem 2: → EVEN OR ODD

IPO:

1. Input a Number
2. Number is Positive
3. Number divisible by 2
give '0' as remainder
4. Output Even

Pseudocode:

START

Input value, a

WHILE, $a > 0$

IF, $a \% 2 == 0$

PRINT "EVEN"

IF NOT

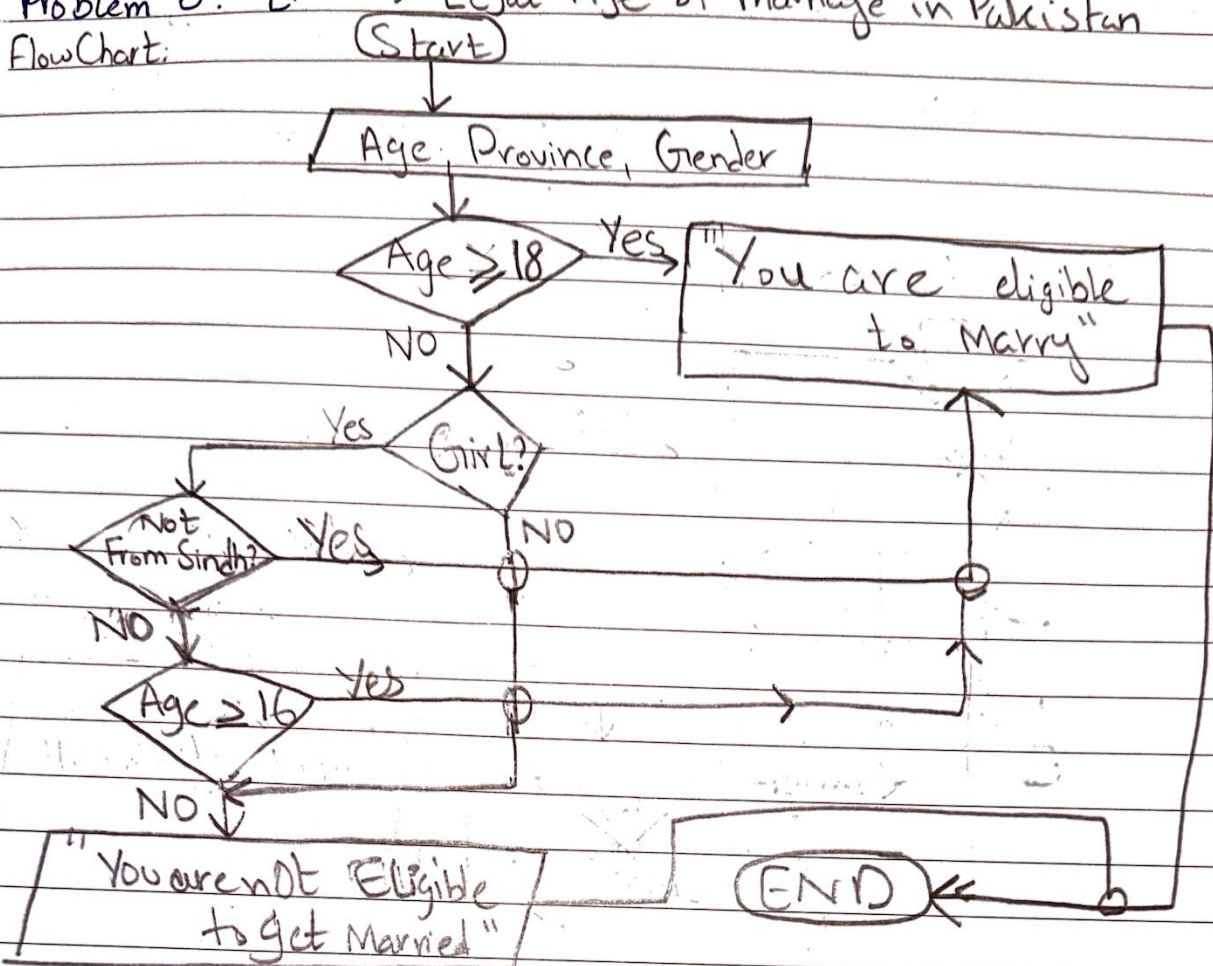

PRINT "ODD"

ENDWHILE

END

Problem 3: Legal Age of Marriage in Pakistan

FlowChart:

Pseudocode.

START

Input Age, Gender, Province

IF , Age ≥ 18

PRINT "You are eligible to get married"

IF NOT,

IF, Girl

IF, Not From Sindh

PRINT "You are eligible to get married"

IF NOT,

IF, Age ≥ 16

PRINT "You are eligible to get married"

IF NOT,

PRINT "You are not eligible to get married"

IF NOT,

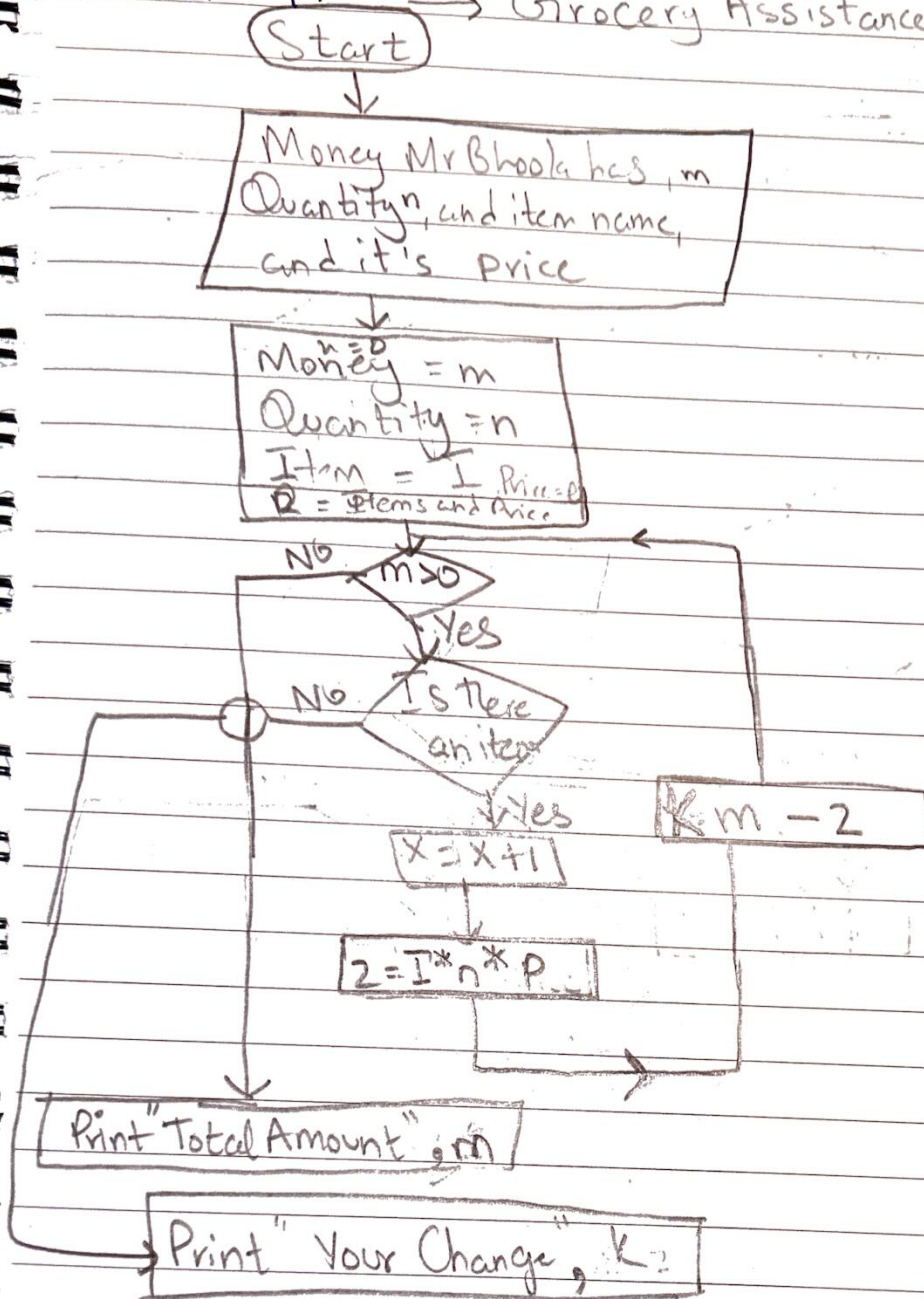

PRINT "You are not eligible to get married"

END

IPO:

1. Age, Province, Gender
2. Sindh > 18
3. Punjab and others
Girl > 16 , Boys > 18

Problem 4: Grocery Assistance Calculator

Pseudocode:

START

Input money, item, quantity, price

IF, money > 0

IF, There is a item

Then $Z = \text{Item} * \text{Quantity} * \text{Price}$

$K = \text{Money} - Z$

IF NOT

PRINT "Your Change", 'k'

IF NOT

PRINT "Total Amount Spent", 'm'

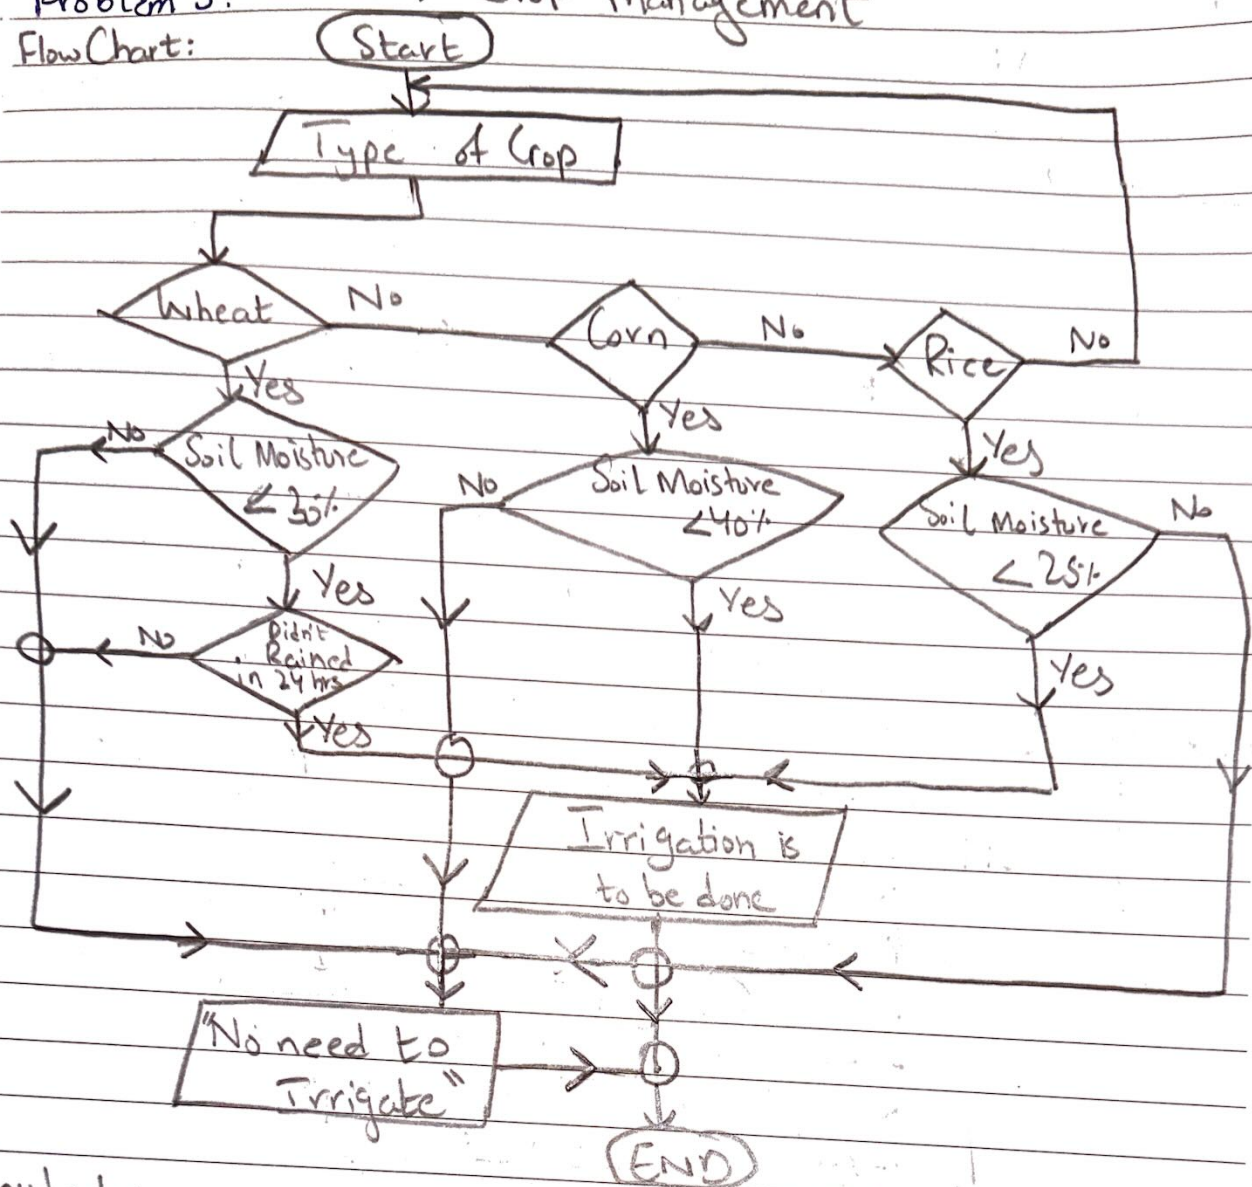

END

I.P.O.:

1. Input Money
2. Item, Price, Quantity
3. Multiply item, price and quantity
4. Keep the loop until money ends or the item
5. Output the total amount spent and if there is a clerk

Problem 5:
FlowChart:

→ Crop Management

Pseudocode:

START

Input Type of Crop

IF, RICE

IF SOIL MOISTURE < 25%.

THEN IRRIGATE

IF NOT,

THEN NO NEED TO IRRIGATE

IF NOT

THEN IF, Corn

IF Soil Moisture < 40%.

THEN IRRIGATE

IF NOT

THEN NO NEED TO IRRIGATE

THEN IF NOT,

IF, RICE

IF RICE

IF Soil Moisture < 30%.

IF, Didn't Rained in 24 hrs

THEN, IRRIGATE

IF NOT

IF NOT

THEN, NO NEED TO IRRIGATE

IF NOT,

END

IPO:

1. Type of Crop

2. If Wheat, the

Soil moisture is below 30%

and it has not rained in

last 24 hrs, irrigation will

3. If Corn, the soil moisture

is below 40%, irrigation

will be done

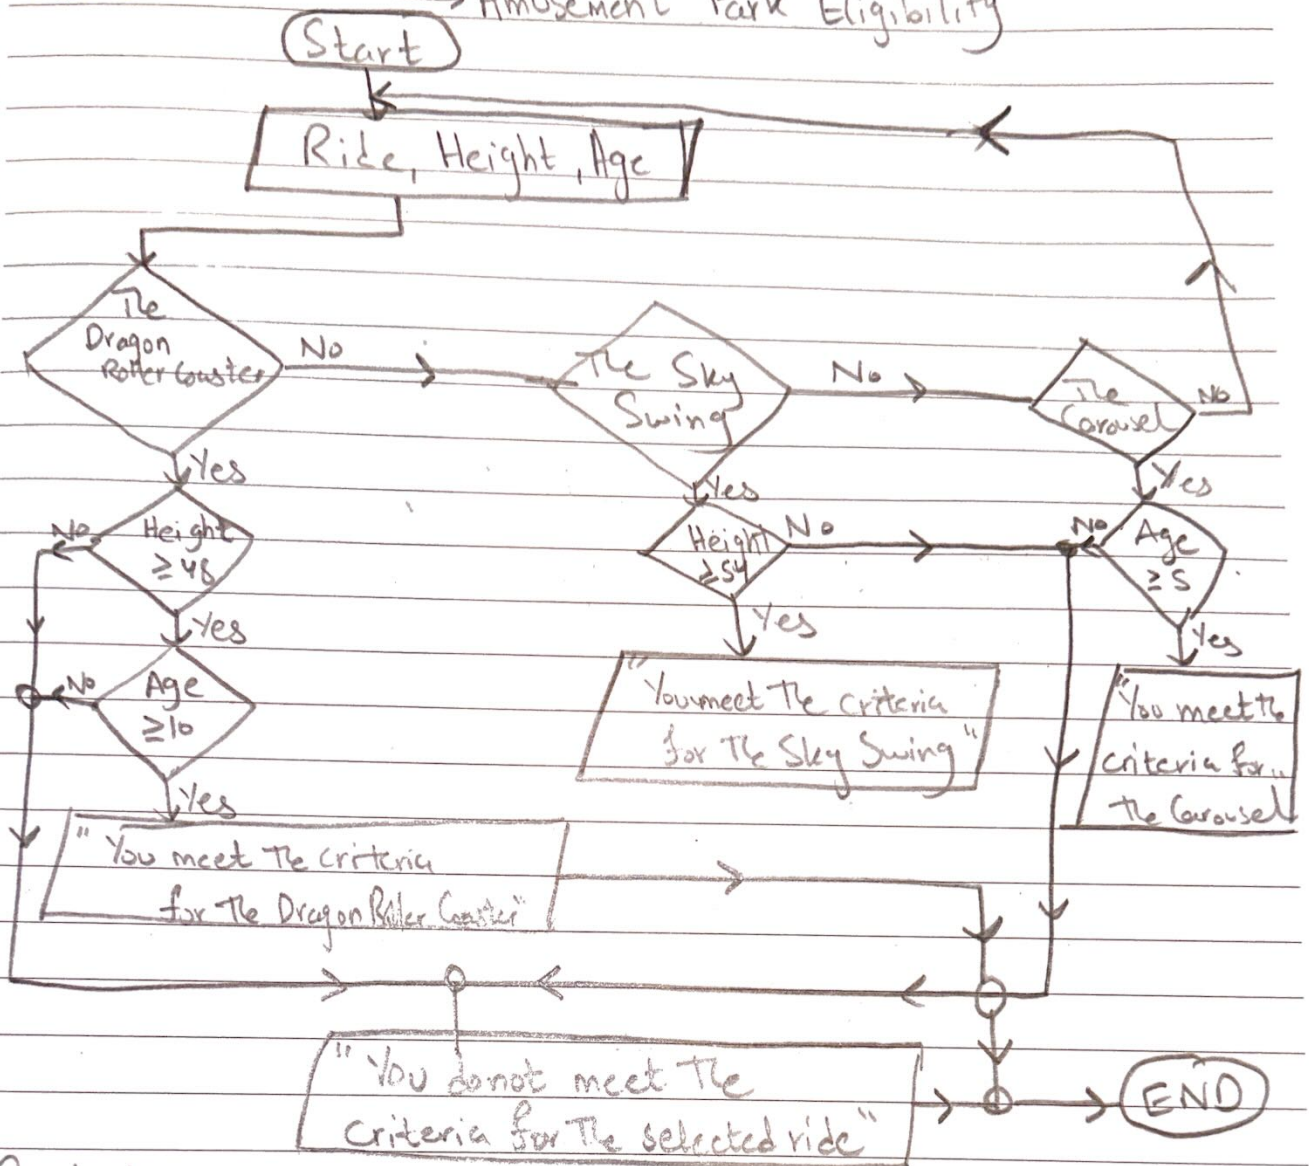

4. If rice, the soil moisture

is below 25%, irrigation

will be done

Problem 6 :

Amusement Park Eligibility

Pseudocode:

START

INPUT, Ride, Height, Age

IF THE CAROUSEL

IF, Age ≥ 5

THEN, PRINT "You meet the criteria"

IF NOT,

THEN, PRINT "You do not meet the criteria"

IF NOT

THEN IF, THE SKY SWING

IF, HEIGHT ≥ 54

THEN, PRINT "You meet the Criteria"

IF NOT

THEN, PRINT "You do not meet the Criteria"

IF NOT

THEN IF, THE DRAGON ROLLER COASTER

IF, Height ≥ 48

IF, Age ≥ 10

THEN, PRINT "You meet the Criteria"

IF NOT,

IF NOT, THEN, PRINT "You do not meet the Criteria"

END

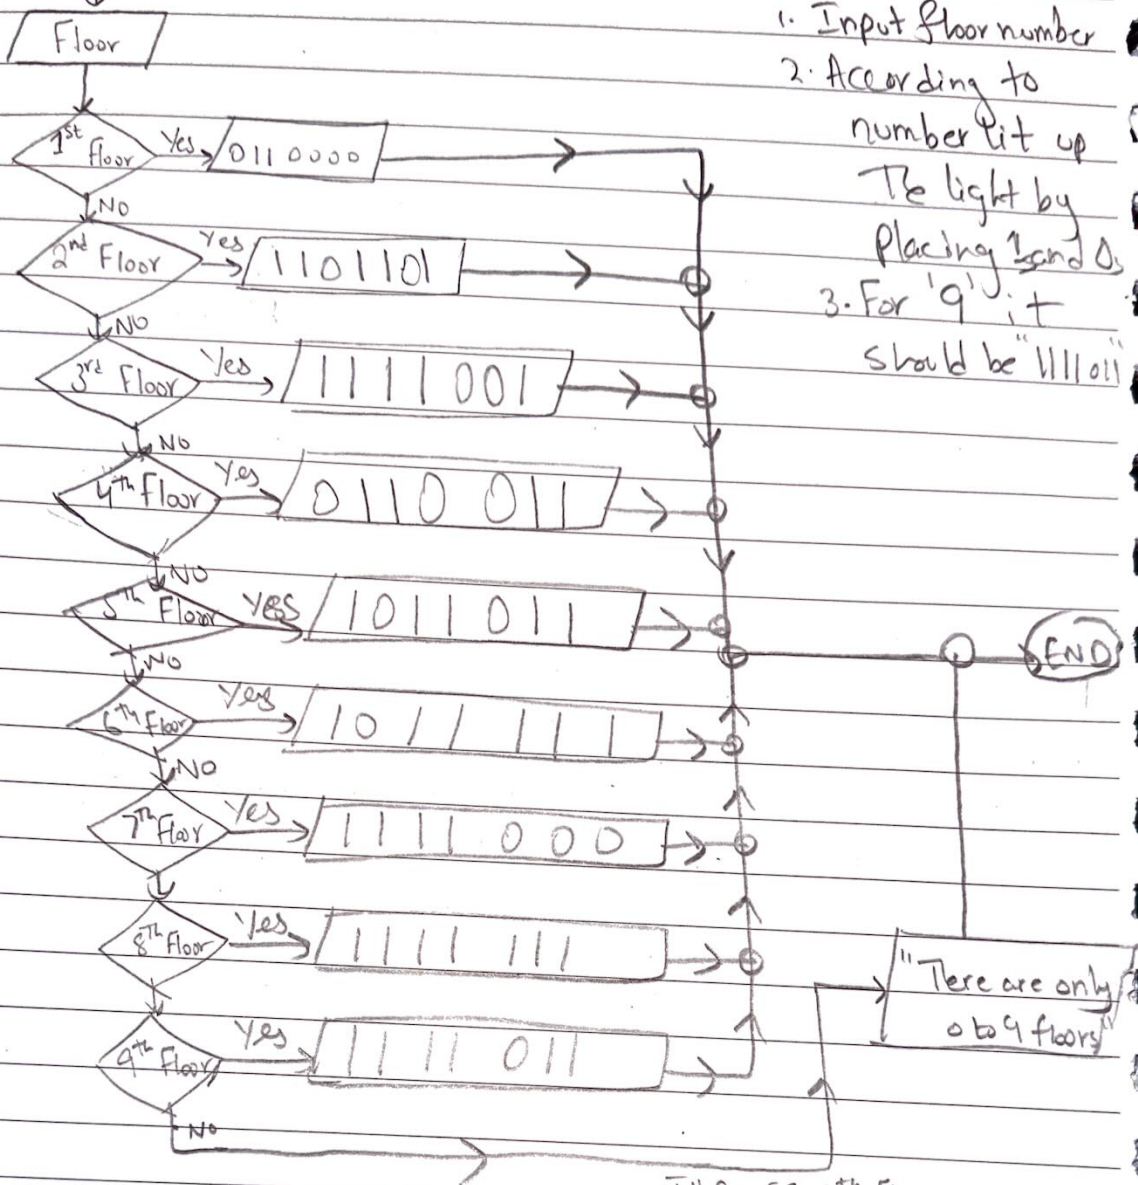

I. P. O :

1. Input Height, Age, Ride
2. If The Dragon Roller Coaster, then height ≥ 48 inches and age ≥ 10 years
3. If The Sky Swing, then height ≥ 54 inches
4. If The Carousel, then age ≥ 5 years

Problem 7:

Which Floor

Flow Chart: **Start**

IPs:

1. Input floor number
2. According to number lit up the light by placing 1 and 0
3. For '9' it should be "1111011"

Pseudocode:

START

Input Floor Number

IF 1st Floor

THEN, output 0110000

IF NOT

THEN IF, 2nd Floor

THEN, output 1101101

THEN IF NOT

THEN IF, 3rd Floor

THEN, output 1111001

THEN IF NOT

THEN IF, 4th Floor

THEN, output 0110011

THEN IF NOT

THEN IF, 5th Floor

THEN, output 1011011

THEN IF NOT

THEN IF, 6th Floor

THEN, output 1011111

THEN IF NOT

THEN IF, 7th Floor

THEN, output 1111000

THEN IF, 8th Floor

THEN, output 1111111

THEN IF NOT

THEN IF, 9th Floor

THEN, output 1111011

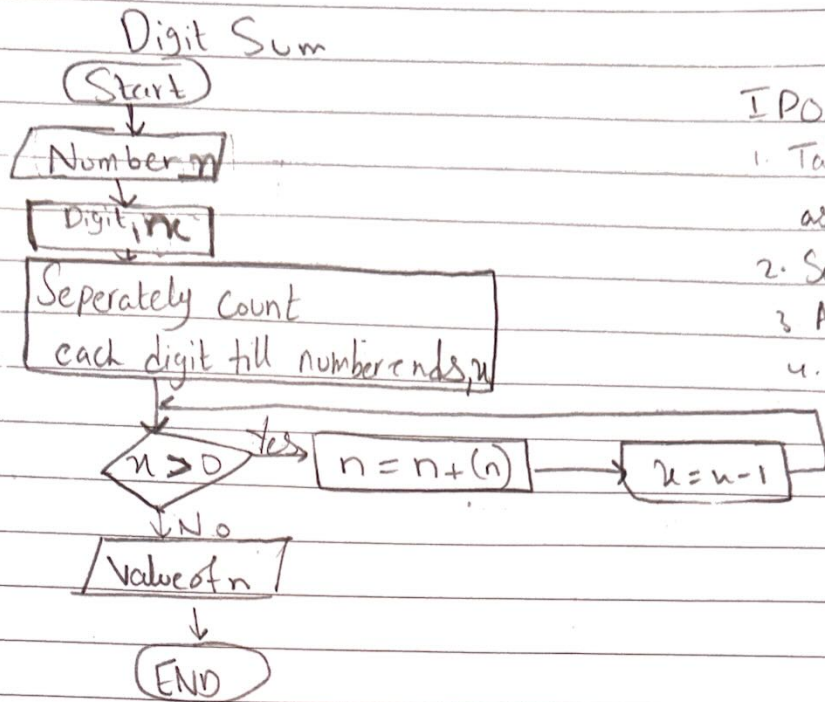

IF NOT

THEN, PRINT "There are only 0 to 9 floors"

END

Problem 8:

FlowChart:

IPO:

1. Take a number as a input
2. Seperate it
3. Add all the values
4. Output The Sum

Pseudocode:

START

Input a Number, seperate each digit by $n_1, n_2, n = 0$

Count The number of digits of The number entered, n

IF, $n = 0$

THEN, $n = n + (n_1)$ and $n = n - 1$

IF NOT

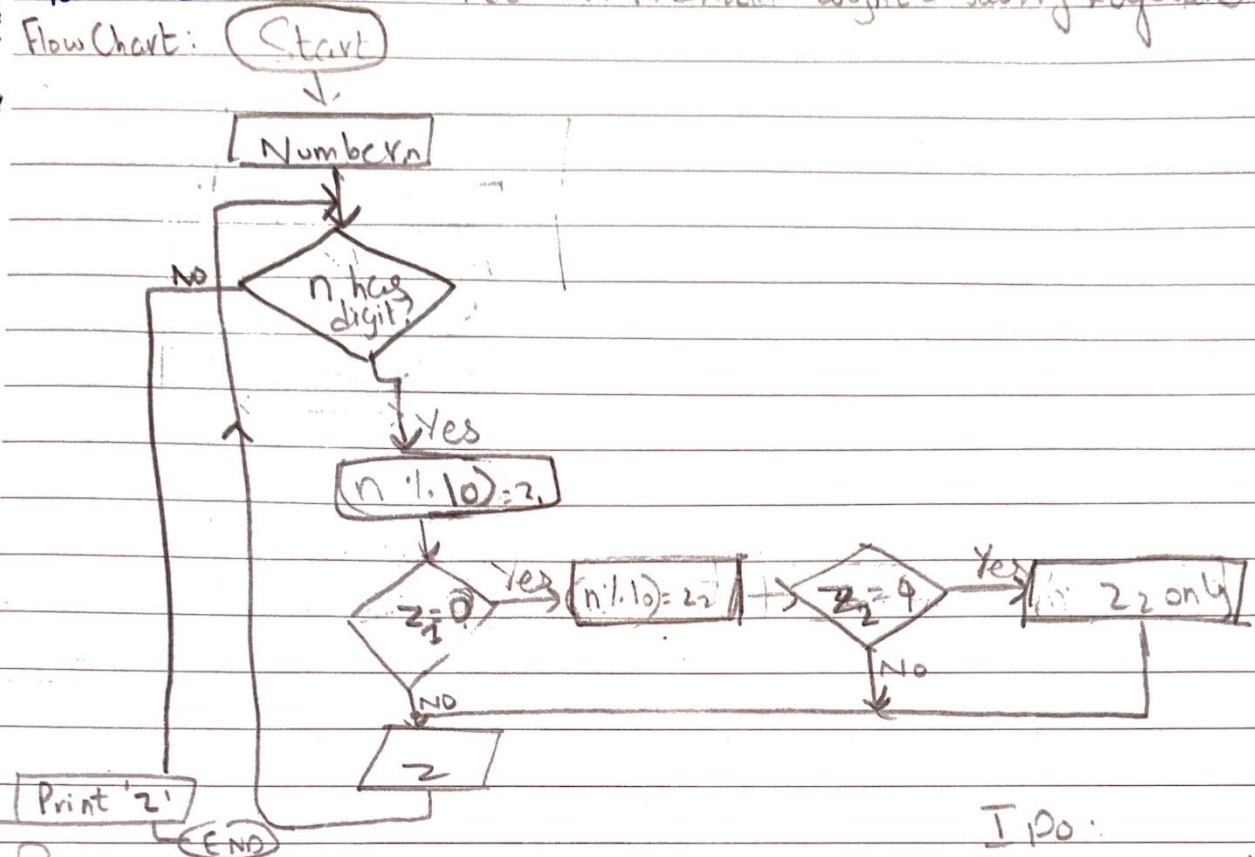

THEN, output The value of 'n'

END

Problem 10:

Poor Mr. Ghosh bought a faulty keyboard.

Flow Chart:

Tip:

1. Enter a number
2. n has digits
3. if $n \% 10 = z_1$, if $z_1 = 0$, then $n \% 10 = z_2$. If $z_2 = 9$ then only z_2 to be printed.
4. If not then keep printing 2 and $n \% 10$

Pseudocode

START

INPUT Number, n

IF n has digits

THEN, $n \% 10 = z_1$

IF $z_1 = 0$

THEN $n \% 10 = z_2$

IF $z_2 = 9$

THEN output 'z2' only to '2'

IF NOT

THEN output 'z1' and 'z2' to 2

IF NO

THEN output '2' to '2'

IF NOT

THEN PRINT 2

END

Problem 11:

No not optimum Prime its Coprime

FlowChart:

(Start)

Input a number, n_1
Input a number, n_2

$n > 1$

$n_1 \neq u$

NO

YES

$n_1 \div u = a$

"a"

$u = u + 1$

$n_2 \neq u$

NO

YES

$n_2 \div u = b$

"b"

$u = u + 1$

Common digits
exist of 'a' and 'b'

NO

YES

Print "Numbers
are Coprime"

Print "Numbers are not
Coprime"

END

T.P.O.

1. Input two numbers
2. $n > 1$
3. $n_1 \div u$, till $u = n_1, n_1 \div u = a$
4. $n_2 \div u$ till $u = n_2, n_2 \div u = b$
5. a and b if not common then number is a coprime.

Pseudocode:

START

INPUT numbers, n_1, n_2

$n > 1$

IF $n_1 \neq u$

THEN, $n_1 \div u = a$ and $u = u + 1$, output a

IF not

THEN IF, $n_2 \neq u$

THEN, $n_2 \div u = b$, and $u = u + 1$, out b

IF not,

THEN IF, There are common digit of a and b

PRINT, "Numbers are not Coprime"

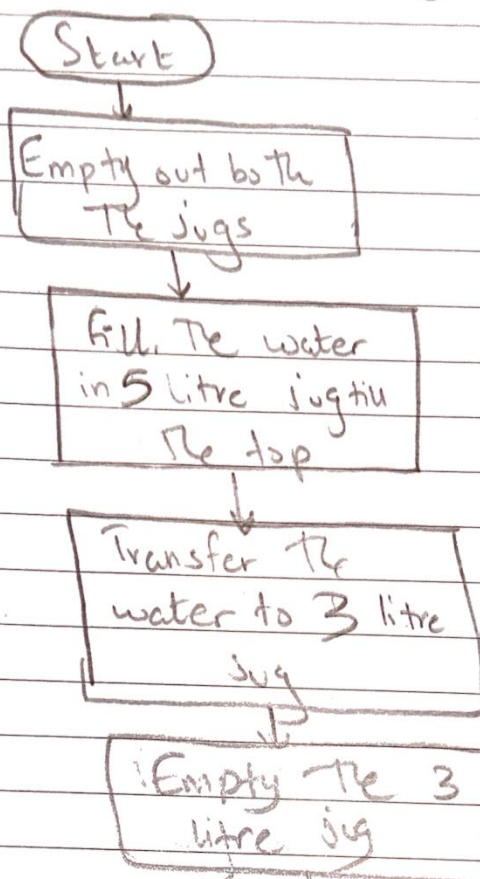

IF NOT

PRINT "Number are Coprime"

END

Problem 12: Die Hard - Defusing The Bomb

FlowChart

T.P.O:

1. Fill the water in 5 litre jug
2. Transfer the water to 3 litre jug
3. Empty the 3 litre jug
4. Pour the 2 litre remaining into 3 litre jug
6. Fill the 5 litre jug again
7. Pour 5 litre jug to 3 litre till it fills
8. Now you have 4 litres in 5 litres jug

PseudoCode:

START

- Empty out both of jugs
- Fill the water in the 5 litre jug till the top
- Transfer the water to 3 litre jug
- Empty the 3 litre jug
- Transfer the 5 litre jug into the 3 litre jug
- Fill the 5 litre jug again
- Pour water in 3 litre from 5 litre jug
- Put 5 litre jug on the sensor
- Print "You survived"
- END

Pour the remaining 2 litres from the 5 litre jug into 3 litre jug

Fill the 5 litre jug again

Pour water from 5 litre jug into the 3 litre jug till top

Place the 5 litre jug on the sensor

Print "You Survived"

END
